NON-PENETRATING PORTABLE GUARDRAIL FALL PREVENTION SYSTEM

Fall prevention gate to protect open loading docks, mezzanines and more. Two models: Single opening and Split opening. Single opening is designed for hazards up to 12 ft wide. Easy operation and OSHA compliant. Optional air-powered Cantilever Gate lifting utilizes existing 50 psi air-supply and 120-volt current with controls and strobe activation light. Split opening is ideal for wider hazards and low ceiling heights.

SPECIFICATIONS - MEETS OSHA 1910.23(C)

- Side Railings in 2' to 12' lengths x 42" h, plus custom.
- Sizes available from 4 feet up to 13 feet.
- Standard 10' length is perfect for 8' wide doors.
- Only 6 concrete anchor bolts hold system securely.
- Only requires 12" square footprint for installation.
- Meets and exceeds OSHA fall protection standards.
